FUTURE for FOOD

An evening in serene rice paddies, blending farm experiences and sustainable dining that reveals a delicious, forward-thinking vision for the future of our food.

98% *of our food relies on chemical farming, a system bound to end. The future of food will be radically different.*

HIGHLIGHTS

Join a garden scavenger hunt to pick fresh plants for dinner from our permaculture garden.

Give back by planting food for future guests, continuing a cycle of reciprocity.

Learn from our chefs how traditional Balinese plants shape the future of food.

End the day with a magical night in the rice paddies under starlit skies.

IMPACTS OF THIS EXPERIENCE

- **Personal** – Understand the challenges of our modern food system and leave inspired with hope for real solutions.
- **Environmental** – Learn to identify and grow nourishing, healing plants naturally and restoring both soil and ecosystems.
- **Economical** – Support collaboration between young and elder Balinese farmers for healthier, more resilient livelihoods.
